

## PARG Objectives are to :

- Bring together Amateur Radio Operators, Shortwave Listeners and electronic enthusiasts into a hobby group which will maintain and promote Amateur Radio.
- Promote an awareness within the community of the various activities within the Amateur Radio movement.
- Provide assistance to those wishing to become Radio Amateurs.
- Offer assistance to emergency services during contingencies using our trained members and the club communications trailer.
- Promote interaction between families of members of the radio group.

# Peel Amateur Radio Group

Peel Amateur Radio Group (PARG) was formed in 1982 and is composed of licensed amateur radio operators, short wave listeners and electronics enthusiasts who volunteer personal time, skill and equipment to serve in the public interest within the Peel District of Western Australia.

## Annual PARG Events

- International Morse Code Day Trivia contest
- Annual PARG Hamfest/Swapmeet - 1st Sunday in Feb
- Annual PARG Birthday Bash - 2nd Sunday in Aug
- International Lighthouse Weekend (mid Aug)
- Jamboree on the Air (late Oct)

Full details of all events are available on <http://www.parg.org.au/home>

Amateur Radio is a pastime in which individuals are licensed to build and operate radio transmitting equipment, to experiment with and learn about electronics and communications. Radio amateurs use various modes of transmission, including voice, Morse code, data, image modes which allow communications across the city or the world and even via satellites and the International Space Station.

At PARG, we maintain a close working relationship with Peel region emergency stakeholders including the SES and Police and regularly exercise our emergency communications capabilities in support of their activities.

In addition we provide the following services to the Peel community:

- Support for people wishing to get their amateur radio license.
- Maintaining a radio repeater station covering the Peel region.
- Maintain a specialised group of trained emergency radio operators, technicians and portable equipment which can be deployed at short notice to provide emergency communications.
- Working with local schools and scouts and guides to provide training and practical demonstrations, such as Amateur Radio on the International Space Station (ARISS) and Jamboree on the Air (JOTA).
